Schedule 14 RC-C Part II - Loans to Small Businesses and Small Farms

Report the number and amount currently outstanding as of the report date of business loans with "original amounts" of \$1,000,000 or less and farm loans with "original amounts" of \$500,000 or less. The following guidelines should be used to determine the "original amount" of a loan:

(1) For loans drawn down under lines of credit or loan commitments, the "original amount" of the loan is the size of the line of credit or loan commitment when the line of credit or loan commitment was most recently approved, extended, or renewed prior to the report date. However, if the amount currently outstanding as of the report date exceeds this size, the "original amount" is the amount currently outstanding on the report date. (2) For loan participations and syndications, the "original amount" of the loan participation or syndication is the entire amount of the credit originated by the lead lender. (3) For all other loans, the "original amount" is the total amount of the loan at origination or the amount currently outstanding as of the report date, whichever is larger.

Banks are not required to risk-weight each on-balance sheet asset and the credit equivalent amount of each off-balance sheet item that qualifies for a risk weight of less than 100 percent (50 percent for derivatives) at its lower risk weight. When completing items 34 through 54 of Schedule RC-R, each bank should decide for itself how detailed a risk-weight analysis it wishes to perform. In other words, a bank can choose from among its assets and off-balance sheet items that have a risk weight of less than 100 percent which ones to risk-weight at an appropriate lower risk weight, or it can simply risk-weight some or all of these items at a 100 percent risk weight (50 percent for derivatives).
